

# Customised project folders in just a few clicks

With the new presentation folder on MYPROLICHT, PROLICHT offers an innovative solution for architects, lighting designers and interior designers. The digital tool makes it possible to quickly and easily create professional project presentations, customise them and share them directly with clients. With a single click, any MYPROLICHT project can be transformed into a personalised digital website. Users can upload and customise mood boards, reference images, product information and even their own content.

Key features of the presentation folder

- Ready to use: just a few clicks to create directly on MYPROLICHT.
- Customisable: Customise the title, text, images, modules and project details.
- Easy to share: Download the finished presentation as a file or send it via a link.
- Professional presentation: Clearly laid out with mood boards and technical details.

The digital presentation folder allows you to communicate lighting concepts accurately and vividly - perfect for client meetings, pitches or project handovers. This intuitive tool saves time and ensures a consistent, visually appealing presentation of the lighting design.

The MYPROLICHT presentation folder is now available to registered users. Click here for more information and a sample presentation:
