DESIGN MEETS ACOUSTIC

Lullaby is the first result of the collaboration between Marc Sadler's creative intuition and Prolight: an emotionally compelling pendant light system, merging sound absorbing features with high performing architectural lighting.

This innovative luminaire blends various specialties into an original lighting design, featuring attributes that appeal to human senses. Ambient light, volumes, color, texture, and noise absorption come together to form Lullaby, a luminaire that plays with perception and evokes a unique sensory experience.

Together with single pieces in six different variants, Marc Sadler designed three "Clouds", astonishing sets of Lullaby capturing the essence of this innovative design icon, offering infinite

Seite 1

configurations in colours and possible shapes, to create your own personalised light artwork, from combinations of individual panels to the contemporary masterpiece of pre-designed “clouds” configurations.

Lullaby is envisioned to create limitless compositions, crafted from slim and vibrant foils, light radiates from its edges, with a clean and defined beam, controlled by a miniaturised linear raster reflector, making it a perfect solution for the most challenging light requirements, such as big spaces or office lighting. Konfigurationen in Farben und möglichen Formen ermöglichen es, ein eigenes, personalisiertes Lichtkunstwerk zu schaffen, von der Kombination einzelner Paneele bis zum modernen Meisterwerk der vorgefertigten "Cloud"-Kompositionen.

Bild Nr. 03, 08: The product family consists of six panels with direct light and three prefabricated clouds. Customers can use the PROLICHT configurator to create their own customised luminaire.

Bild Nr. 04, 07: Choose from 32 acoustic colours to give your LULLABY luminaire individuality.
