

# JUST BLACK

## The finest line

**JUST BLACK emerges as a sleek black line seamlessly connecting delicate architectural lighting. This hyper-miniaturised track harmonises form and function within a system that seamlessly blends beauty and precision.**

With this family, Prolight introduces a brand-new range of light inserts, thoughtfully scaled and designed to harmonise with JUST BLACK track, offering a comprehensive solution for minimalistic and versatile illumination, including technical spots, downlights and linear inserts, and decorative pendants and spheres for general lighting. The highlight of the family is the new Flexline, a flexible strip designed to be installed completely flush to the track edge, suitable for installation in both straight and curved profiles.

**The imperceptible black line freely traces the trajectory that the tiny lighting inserts will follow, with infinite possibilities of configuration of linear and curved elements, enabling the creation of unique installations that transcend the original concept of a linear arrangement with light.**

The system features an hyper-miniaturised surface-mount track, powered at 24V and featuring magnetic installation of inserts. In the suspended version, the track undergoes an aesthetic transformation with a cylindrical shape for suspended installation, and the range is completed with the JUST BLACK trimless, embedded into surfaces for a visually impeccable appearance.

The family is completed with JUST BLACK Standalone pieces: the fusion of pure lines and light. These luminaries radiate a pleasant aura characterised by the delicacy and rationality of the miniaturised .
