

JUST BLACK ACOUSTIC

An oasis of calm and color

JUST BLACK ACOUSTIC transforms the ambient space into an oasis by seamlessly integrating the unique, miniaturised luminaires from the Just Black track system into vibrant, sound-absorbing acoustic panels.

JUST BLACK ACOUSTIC presents pre-designed panels in 32 colours, resembling colourful tapestries that add an extra layer to interior design. In circular, rectangular, and quadrangular shapes, these panels can be arranged in the preferred configuration, enclosing a space and creating islands within the interior design.

Each piece can be customised and arranged with different combination of the Just Black inserts, allowing the tailoring of each module to the specific needs of the space, thus creating a serene ambiance, contributing to the confort and well-being of individuals.
